# FALL PLANTING

---

Fall is much the best time for planting hardy trees, vines, shrubs and plants, and we can and do ship them all through October and November. We recommend, however, that they be left standing in the nursery up to October 15th to ripen and harden. When planted in the fall, the cut ends of the roots callous by spring; the winter's rains and snows settle the soil closely around the roots and the tree is ready to start to grow early and with vigor. It is also well to bank the soil high around the trees and plants as a protection to the roots and to prevent too much swaying in the wind. This applies to all stock offered herein except strawberries, black raspberries, dewberries and perhaps peaches. These do not do as uniformly well when planted in the fall.

Another thing in favor of fall planting is that the weather is usually better, the soil dryer, and you have more leisure than in spring. But if the weather is wet and you are finally obliged to plant in the mud, if at all, the winter's frost will pulverize the soil again; while if you plant in the mud in the spring, the ground will be hard and uncongenial all summer.

After fall the next best time to plant is early spring, as soon as the ground is dry enough to work well, especially strawberries and black raspberries. Late spring planted stock may do well if the weather is favorable; but if it should turn hot and dry early, the stock will certainly suffer, even if it does not die. For this reason it is a good plan to get the trees and plants in the fall, even if you do not plant until spring. Heel them in as recommended below, and have them on hand to plant whenever you are ready.

**Direct to you.** We have no salesmen or agents to pay or protect, and therefore sell to you at strictly wholesale prices. You save from 25 per cent to 50 per cent—all commissions, rebates, and expenses usually paid salesmen and jobbers. We grow our own stock and our charges are as low as equal quality can be bought anywhere.

**39 Years in Business.** We have been in this business 39 years, and have built up a large trade in every state and in Canada. Our reputation among nurserymen and fruit growers is the best, and we are amply responsible. You can have the greatest confidence in us.

**Club Orders.** Parties requiring but few vines and plants are invited to take advantage of our offer to send \$10.00 worth, freight paid, by clubbing in with, or taking orders of their neighbors.

**How to Order.** Make out your order on blank facing back cover. Follow instructions given at top of this order blank, and write plainly. Additional order blanks will be sent, if you need them.

**Superior Packing.** Our packing, for which we charge nothing, is not excelled by any other establishment. Good stock, in our opinion, must not be jeopardized by poor packing. Our customers often call our packing "a work of art." Not only do we pack with a view to entire safety, but also as lightly as possible, in order to reduce transportation charges to a minimum. We pack our goods to carry safely to any part of the world. Everything is carefully labeled.

**Our Shipping Season** extends from October 15th to May 15th. From Dec. 1st to March 15th by mail and express only.

**Express rates** have been very much reduced within the year. The 100 lb. rates about 20 per cent., but nursery stock is carried 25 per cent. below that even, and small packages travel at a much smaller percentage of the 100 lb. rate than a year ago. Nor are the charges any higher for being handled by two or more companies. Moreover, since express shipments are so much speedier than freight, we can pack a little lighter. All this has reduced the expense of express shipments so much that they frequently are less than one-half as much as they used to be. We now advise the use of express for all shipments under 75 lbs. except those under 10 lbs., when mail is usually cheaper.

**Care of Stock when Received.** When the stock arrives, unpack and plant at once. If not ready to plant when received, heel them in, in a well drained place, protected both against sun and sweeping winds. Dig a trench deep enough to hold the vines, plants or trees, open the bundles and spread them out against the side of the trench; cover them with a layer of soil, which press against the side of the trench to exclude air; and put on another layer of stock and soil, etc., until completed, taking great care to keep the different varieties separate and well labeled. If the vines and plants are left to be heeled in over winter, both root and top must be well covered with earth, and over that place a little coarse horse manure or other litter to insure safety. Trees are heeled in leaning with the prevailing wind at an angle of 30 to 40 degrees and buried one-third to one-half of their length. The balance may be covered with evergreen boughs or other brush, but nothing that would attract mice.

**Our References.** Regarding our reliability and responsibility we would refer you to the Citizens Trust Co. and National Bank of Fredonia, or any public officer here. Your own banker may also be able to give you our standing from the Mercantile Reports. When inquiring do not forget to enclose a self-directed and stamped envelope for reply.

## HARDY PERENNIAL PLANTS

This class of plants, unlike shrubbery, die to the ground in the Fall, but grow again from the same root in the Spring larger and richer every season. All that is necessary for their cultivation is a light coating of manure in the Fall and to keep the ground mellow and clear of weeds during the Summer.

A collection of them is very interesting indeed. There is always something in bloom from early Spring to late Fall and some days most of them. A border some four to ten feet wide along a walk or drive is just the place for them. An evergreen or privet hedge against which to offset the bright colors makes a most suitable background for them. Pinching off flowers when faded to prevent their going to seed keeps many of them in bloom much longer.

**Achillea, Rosy Milfoil**—Foliage deep green, finely cut. Flowers appear in large, flat heads, in great profusion from June to late fall, and are a bright cherry red. Very showy. 18 inches. Each 15 cents; 10 for \$1.25.
